DETAILED ACTION

Response to Arguments

The error in the previous Office action is regretted. The patent number in the double patenting rejection was incorrect and off by one number. See corrected rejection below.

Allowable Subject Matter

Claims 8-16 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art either alone or in combination does not disclose nor reasonably render obvious the scanning apparatus as set forth in independent claim 8 wherein the drums are hollow and the drums transmit/reflect plane polarized radiation, in combination with the rest of the claimed limitations.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225

Art Unit: 2872

USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 7,154,650 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claim are broader in scope than the conflicting claims. All of the limitations of the instant claims are found in the conflicting claims, although in different combinations. For example, conflicting claim 1 contains several limitations not present in instant claim 1, such as (1) an additional reflection of the radiation before being reflected towards the receiver(s) and (2) substantially linear scan et seq. Conflicting claim 9 contains limitations that are in instant claims 1-5. Conflicting claims 1-3 match instant claims 6 and 7.
